1. Claims 1-32 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art taken singly or in combination does not teach or suggest, a chipset system among other things, comprising a queue mechanism comprising a first functional unit block (FUB), coupled to the graphics accelerator at a first physical partition on the chipset die, to perform a first set of functions for the queue mechanism, and a second FUB, coupled to the memory controller at a second physical partition on the chipset die, to perform a second set of functions for the queue mechanism.

The closest prior art, Gulick et al. (U.S. Patent No. 6,523,019) teaches a chipset including a graphics accelerator, a memory controller, and a queue mechanism having first FUB and second FUB performing first and second sets of functions.

However, reference Gulick et al. does not teach the first and second FUBs are at a first and second physical partitions on the chipset die.
